

Dr Alison O'Connell is a Fellow of the Institute of Actuaries and a policy adviser on longevity, pensions and risk issues. She is a board member of the Earthquake Commission of New Zealand and has recently been a panel member in the Long-Term Fiscal process for The New Zealand Treasury. Alison was the founding Director and is now a Governor of the UK's Pensions Policy Institute, which provides non-political, evidence-based analysis on retirement income policy. Her research interests include international public and private pension policy structures and outcomes, the use of mortality and longevity forecasts in policy, and the ageing society.
